CUSTOM TUNE SHEET - Tunes range from \$30 - \$60 (parts included)
PLEASE INCLUDE A STANDARD SERVICE FORM WITH ALL TUNING SHEETS

Custom tunes shouldn't come in the form of cookie cutter valve stacks or overpriced pistons. Our approach is different. We use riding style, weight, frame design, and rider input to develop a tune that will optimize the riding experience without breaking the bank.

Bike Manufacturer _____ Bike Model and Year _____

Rider weight with gear _____ Tire Pressure Front / Rear _____/_____

Age _____ Date of last rebuild _____

Are you racing? What Type? _____

Primary Type of riding:	XC Race	XC	Trail	Aggressive Trail/Park	DH Race	DH
Describe your riding style / preferences:				Note any particular issues you are experiencing.		
Plow through	-or-	Jump over		Frequent bottom out		
Pump	-or-	Skim		Lack of small bump performance		
Heavy-footed	-or-	Light-footed		Lack of support		
Supportive	-or-	Supple		Feeling of deflection through chatter		

Use the following boxes for desired tune attributes and add ons

More usable range of compression adjustment

More progressive feel

More usable range of rebound adjustment

Firmer climb/propedal mode

1 can of Maxxima SC-1 Stanchion / seal lubricant \$15

Look into possible OEM part upgrades
